

SAFE ROUTES TO SCHOOL PROJECT

Dear Resident:

You are receiving this letter because construction for the Safe Route to School Sidewalk Improvement Project is scheduled to begin the week of March 30th, 2026.

This project will include sidewalk installation along State Street, High Avenue, Elm Street, and Panama Avenue. Other construction items will include partial driveway patching, pavement patching, spot curb removal and replacement, and landscape restoration. Throughout the course of the project, the area will experience construction traffic, lane closures, and sidewalk closures.

As sidewalk is installed through your driveway, driveway access will be restricted. A notice will be distributed 24-48 hours before loss of driveway access. A barricade will be placed in front of your driveway until the concrete has achieved enough strength to be driven on. Until the barricade is removed, please park on the opposite side of the street or on a street not affected by the construction.

The project is estimated to be complete by the end of June. Due to the scope and nature of this project, as well as the potential impacts due to weather, some delays and disruptions may occur. Please note that there will be times when no work is occurring on your street as construction activities may be focused elsewhere on the project. The goal is to complete all of the work as quickly as possible.

During construction, if you have any questions or would like to meet with a project representative onsite, please contact Mayra Ocampo of Engineering Enterprises, Inc. at (331)321-0542. Please remember to exercise additional caution while driving through the construction area. Your cooperation and patience are greatly appreciated.
